Mr. Calvert is a Professional Engineer with 20+ years of experience in project management, structural engineering and construction management. He is licensed in the State of Texas and (7) other states. Mr. Calvert is a Structural Engineer that works with Total Engineering Services, LLC. He oversees design tasks and is experienced in steel, concrete, wood and masonry structures. He is experienced in precast concrete cladding and post tensioned and pre-stressed concrete structures. Mr. Calvert has designed foundations for gravity and lateral loading including drilled piers, spread footings, basement walls and isolated cantilever retaining walls. Mr. Calvert is experienced in all aspects of construction design and implementation including negotiating contractor and owner agreements, performing construction site inspections and working closely with contractors during the construction process to implement the structural designs.
